This workshop is a comprehensive approach to understanding the dynamics that cause and maintain poverty from the individual to the systemic level. Participants will receive specific strategies for improving outcomes for people living in poverty.

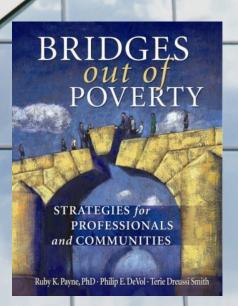

Day 1: Bridges Out of Poverty

Develop a mental model of poverty and learn how relationships and
"tyranny of the moment" trump all. Explore the hidden rules of
survival for poverty and middle class. Understand the difference
between formal and informal register and how to make our
communications meaningful. Identify resources needed to achieve
middle class (it's not all about money). Identify ways to strengthen
relationships and outcomes: individual,
organizational, and community.

Day 2: Applying Bridges Concepts

Learn how to create relationships of mutual respect. Examine the customer life cycle. Understand the influence mediation has on learning new skills and practice mediation skills that move customers and organizations away from "the moment" and toward choice and future story. Examine barriers to change and stages of change.
